LIQUID GLUCOSE

Pure Performance, Naturally Sweet

Nectafresh Liquid Glucose is a high-quality, food-grade syrup derived from carefully selected, Non-GMO Indian white rice. Using precision-controlled liquefaction and saccharification processes-employing alpha-amylase and gluco-amylase enzymes-we ensure a product that delivers both performance and purity. With a Dextrose Equivalent (DE) of 38 To 44, our Liquid Glucose is engineered to meet the rigorous demands of the food and pharmaceutical industries. Its clean-label profile, consistent functionality, and formulation versatility make it an indispensable ingredient across a wide spectrum of applications.

Key Functional Properties:

- Enhances Fermentability
- High Viscosity
- Humectancy
- Hygroscopicity
- Sweetness
- Anti Crystallizing
- Improves Brightness & Transparency

MALTODEXTRIN POWDER

A Versatile, Clean-Label Ingredient for Functional & Nutritional Formulations

Nectafresh Maltodextrin Powder is a spray-dried white powder produced through the enzymatic hydrolysis of high-quality, Non-GMO Indian rice. It contains a balanced blend of carbohydrates that provide a steady energy release, making it an ideal ingredient for nutritional and functional food systems. Available in both Organic and Conventional forms, our Rice Maltodextrin offering excellent solubility, stability, and compatibility across a variety of applications. It also serves as an efficient bulking agent and carrier for flavors, seasonings, and sweeteners.

Key Functional Properties:

- Effective Carrier for Flavors and Additives
- Bulking and Binding Agent
- Improves Texture
- Supports in Gelling
- Prevents Crystallization
- Thickening and Stabilizing Agent
- Excipients Pharmaceutical & Cosmetic Industry

Packaging Options:

- 25 KG Plastic Bags
- 25 KG Craft Paper Bags

BROWN RICE SYRUP

Natural, Plant-Based Sweetener for Functional and Nutritional Applications

Our **Brown Rice Syrup** is a vegan, gluten-free and allergens-free natural sweetener that is extracted from Indian Non-GMO rice. It has various functional properties. Brown Rice Syrup is produced by converting starch available in rice through the enzymatic hydrolysis processes, using liquefaction and Saccharification process. Brown rice syrup is produced by processing brown rice. This product is available in various degrees of polymerization and dextrose equivalents ranging from 26–70, as requested by the customers.

Key Functional Properties:

- Imparts Clean, Natural Sweetness
- Enhances and Balances Flavor Profiles
- Acts as a Natural Binding Agent
- Improves Texture, Body & Viscosity
- Improves Chewiness and Crispiness in Baked Goods
- Controls Water Activity for Extended Freshness
- Helps in Sugar Fermentation
- Prevents Crystallization
- Functions as a Stabilizer and Thickening Agent
- Supports Freeze-Thaw Stability
- Shelf Life Extension

Packaging Options:

- 300 KG HDPE Drums
- 1400 KG IBC Tanks / Space Craft
- Customized Packaging with Pallet Options

RICE SYRUP SOLID

High-Performance Rice Syrup Solids for Modern Food Innovation

Rice syrup solids also inherit the similar attributes like Rice Syrup. These are also vegan, gluten-free and allergens-free sweeteners that are often used as a bulking agent and bears numerous functional properties. The Indian Non-GMO rice is used to produce these products like rice syrups, these products are also derived from rice using liquefaction and Saccharification processes. The rice syrup is then spray-dried to solids. The rice syrup solids can be produced in the range of 20–42 DE.

Key Functional Benefits

- Natural Bulking Agent
- Texture Enhancer & Mouthfeel Improver
- Moisture Management & Shelf Life Stability
- Freeze Point Depression
- Effective Binder & Crystal Growth Inhibitor

Packaging Options:

- 25 KG Plastic Bags / Craft Paper Bags
- Customized Packaging with Pallet Options

Available in Organic & Conventional Grades

Applications of Rice Protein (Food Grade 80%)

Protein & Energy Bars

Meal Replacements & Nutritional Powders

Bakery & Cereal Products

Health & Fitness Supplements

Dairy-Free & Soy-Free Alternatives

Applications of Rice Protein (Feed Grade 50% to 70%)

Pet Food & Companion Animal Nutrition

Poultry & Aqua Feed

Cattle & Ruminant Feed

Feed Additives & Growth Supplements

RICE PROTEIN

Plant-Powered Purity Clean Nutrition from Himalayan Fields

We produce **Rice Protein** by processing high quality, Non genetically modified Indian rice that is grown in our native Himalayan state of Uttarakhand. It is produced using enzymatic process, applying a gentle separation process without the need for solvents or chemicals. Its mild taste and ease of formulation make rice protein an extraordinary ingredient for foods and supplements for consumers of all ages. With a mild and pleasant taste, it is suitable for dairy-free and soya-free diets. It is vegan-friendly, allergens free and an excellent alternative to other dairy and plant-based protein sources. This makes our product an ideal ingredient for boosting protein content in a wide range of products.

Key Functional Properties:

- Excellent Plant-Based Protein Source
- Smooth Texture & Mild Taste
- Hypoallergenic & Easily Digestible
- Non-GMO, Vegan, and Gluten-Free
- Dairy-Free & Soy-Free Alternative
- High Solubility and Formulation Flexibility

Packaging Options:

- 25 KG Plastic Bags / Craft Paper Bags
- 600 KG Jumbo Bags
- Customized Packaging with Pallet Options

Available in Organic & Conventional Grades

Application of Clarified Rice Syrup

Bakery Products

Confectionery & Chocolate

Beverages & Juices

Ice Creams & Dairy Systems

Energy & Cereal Bars

Pharmaceutical Syrups

Flavored Syrups & Sweet Sauces

Desserts and Frozen Treats

Packaging Options:

- 300 KG HDPE Drums
- 1400 KG Space Craft / IBC Tanks
- Customized Packaging with Pallet Options

CLARIFIED RICE SYRUP

Versatile, Purified, Plant-Based Sweetener Derived from Non-GMO Rice

Our **Clarified Rice Syrup** is a vegan, gluten-free and allergens-free natural sweetener that is extracted from Indian Non-GMO rice. It has various functional properties. Clarified Rice Syrup is produced by converting starch available in rice through the enzymatic hydrolysis process, using liquefaction and Saccharification processes. For making clarified rice syrup, number of purification processes are added. Clarified rice syrup is produced by processing white rice. Clarified rice syrup available in various degrees of polymerization and dextrose equivalents, ranging from 26–70, as requested by the customers.

Key Elements & Functional Benefits:

- Impacts Sweetness
- Enhances and Balances Flavor Profiles
- Acts as a Natural Binding Agent
- Improves Texture and Viscosity
- Improves Chewiness and Crispiness
- Controls Water Activity
- Supports in Sugar Fermentation
- Prevents Crystallization
- Works as a Stabilizer & Thickening Agent
- Enhances Freeze-Thaw Stability
- Contributes to Extended Shelf Life
- Gluten-free
- Allergens-free

Available in Organic & Conventional Grades

Quality and Innovations

Nectafresh Agro Foods is committed to food safety, quality assurance and quality control. We conduct all microbiological, chemical and physical analysis required for raw material, in processes and final products. We have all the instruments required for the deepest analysis of our products to ensure quality, hygiene and food safety. Water used in our process is purified and passed through a reverse osmosis plant before use.
